

Original searches +  
unlogged forward pass

Semantic Scholar, OpenAlex,  
arXiv, 2018--2026; query strings  
and exclusion reasons not kept  
83 core

Citation chaining,  
five logged waves (S1b-f)

seeded from the Table 1 model  
papers and the core studies;  
24,434 fetched, 2,650 screened  
+36 core

Frozen replayable  
search protocol (S1g)

23,353 unique records,  
5,849 screened; every  
query string archived  
+16 core

Direct MEDLINE/  
PubMed protocol (S1j)

4,651 unique records;  
retrieves 19 of the core  
studies (few preprints)  
+0 core

Protocol B: eligibility  
gate widened (S1k)

recovers none of the 25 the  
search misses: 11 match no  
family term, 14 capped  
+0 core

Analysis set: 135 core studies, 167 claim records coded; every stage above is a corpus fact

RETURNED BY A LOGGED, REPLAYABLE STAGE: 132 studies, 164 records

by the frozen search protocol (110 studies) or, passing the keyword screen, by a logged citation-chaining  
fetch seeded from the fixed model-paper list or from a study already so returned, to closure (+22)

UNLOGGED SEARCHES ONLY: 3 studies

reachable only through the original searches;  
excluded in the retrieval sensitivity (S6)
